Summary

Software Developer Intern at DOST-ASTI and BSIT student specializing in Mobile and Web Applications. Develops and deploys full-stack web and Android applications using React, Node.js, Express, Flutter, MongoDB, and Firebase, with experience in REST API design, authentication and role-based access control, API security, real-time notifications, and data visualization. Recognized as a DOST-SEI JLSS Scholar and Dean's Lister, with leadership experience in finance and cybersecurity organizations.

Education

National University, Manila — **Sampaloc, Manila**
Bachelor of Science in Information Technology, Specialization in Mobile and Web Applications — **August 2023 - Present**
Doña Miguela M. Jhocson BLUE Scholar
Dean's Lister | 2023–Present

Arellano University, ABC Campus — **Caniogan, Pasig City**
Science, Technology, Engineering, Mathematics — **2021 - 2023**
Graduated with High Honors. GPA 97

Technical Experience

DOST Advanced Science and Technology Institute (DOST-ASTI)
Software Developer Intern — **November 2026 – Present**

FloodGuard Capstone Development Project
Mobile Developer / Full-Stack Contributor | National University – Manila — **2025–2026**

- Developed and maintained a Flutter/Dart Android application for flood-risk monitoring, geospatial mapping, Firebase Phone Authentication, FCM alerts, emergency Help Requests, request tracking, and production APK deployment.
- Built and integrated React/Vite administrative modules including an operational dashboard, Forecast History, predicted-vs-actual analysis, Historical Replay, Help Request monitoring, user management, system status, calibration/model governance, and audit logs.
- Integrated Flutter and React clients with a Node.js/Express and MongoDB/Mongoose REST backend, implementing JWT authentication, role-based access control, barangay-scoped permissions, persistent workflows, and scheduled telemetry processing.
- Integrated station-specific OLS Multiple Linear Regression forecasting for Sto. Niño, Nangka, and Tumana using the certified C13, C4, and C8 models, with forecast verification using actual observations, MAE, RMSE, Mean Bias, and signed error.
- Strengthened Web and Mobile reliability through endpoint-specific API rate limiting, brute-force protection, duplicate-request prevention, HTTP 429 handling, request coalescing, and automated regression testing.
- Deployed production services using Firebase Hosting, Render, MongoDB Atlas, Firebase Authentication, and Firebase Cloud Messaging, with automated telemetry synchronization, scheduled forecasts, and push-notification workflows.

Leadership & Activities

Amazon Web Services Learning Club - Legarda
Vice Chief Finance Officer 2026

- Assisted in managing operational resources and club assets. Responsibilities included distributing AWS training materials and coordinating logistics for student tech bootcamps and certification workshops.

Junior Blockchain Education Consortium of the Philippines – NU Chapter

Treasurer 2024

- Managed organizational finances and reporting, earning Outstanding Finance Officer recognition with an Unqualified Opinion.

Capture the Flag (CTF) Cybersecurity Competition

Participant, NU Manila **2024**

- Represented NU Manila in cybersecurity challenges requiring analytical thinking, teamwork, and rapid problem-solving.

Certifications

Certiport, a Pearson VUE Business

IT Specialist – Cybersecurity **May 2026**

IT Specialist – Databases **October 2026**

PMI – Project Management Ready **October 2026**

Cisco Networking Academy

Networking Basics | Networking Devices and Initial Configuration |Computer Hardware Basics **June 2025**

Projects

Bulldogs Exchange | Full-Stack E-Commerce Web Application

— React, Vite, Node.js, Express, MongoDB, Mongoose, JWT, bcrypt, Tailwind CSS

- Developed a full-stack e-commerce platform featuring product discovery, shopping carts, checkout, order tracking, reviews, user profiles, and role-specific workflows for customers, sellers, and administrators.
- Built RESTful APIs using Node.js and Express, with MongoDB and Mongoose for persistent data storage across user, product, category, cart, order, and review modules.
- Implemented bcrypt password hashing, JWT-based authentication, role-based access control, protected routes, and seller-level product ownership checks.
- Implemented server-side validation and inventory safeguards, including transactional checkout, stock deduction and restoration upon order cancellation, preorder handling, and order status transition rules.
- Improved user experience through responsive layouts, reusable UI components, loading indicators, toast notifications, and confirmation dialogs for destructive actions.

How to Train Your Birdie

— Java, LibGDX, Android

- Developed a 2D Android game for NU Tech Fiesta featuring multi-stage gameplay, animated enemies, boss battles, scoring, cutscenes, audio, and English/Tagalog content.
- Implemented Java/LibGDX gameplay systems for player movement, combat, enemy behavior, health mechanics, progression, screen transitions, and multiple boss encounters.
- Integrated visual and audio assets with event-ready game screens to deliver a complete playable university showcase project.

Skills

Languages: Dart, JavaScript, Java, Python (Basic), HTML, CSS

Frameworks: Flutter, React, Express.js, Vite, LibGDX

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, API Rate Limiting

Databases & Cloud: MongoDB, Mongoose, MySQL, Firebase Authentication, Firebase Cloud Messaging, Firebase Hosting, Render, MongoDB Atlas

Tools: Git, GitHub, VS Code, Android Studio, Postman, Wireshark

Testing & Deployment: Flutter Test, API/Integration Testing, Android APK Release Builds, Git-based Deployment

Soft Skills: Problem-solving, analytical thinking, teamwork, communication, leadership, accountability, adaptability, time management, attention to detail

Interests: Game development, competitive gaming, PC and peripheral customization, audio tuning, UI/UX design, open-world games (Genshin Impact), and anime.
